SUPERIOR FUEL CONTROL COMBINED
WITH CREDIT CARD PROCESSING

computrol
FUEL SYSTEMS INC

Ci-80 Fuel Commander System

FULLY AUTOMATED SYSTEM

- The ci-80 is a fully automated, unattended fuel management system capable of processing all major credit cards as well as fleet and proprietary "house" cards
- An ideal solution for gas stations, cardlocks, marinas, airports, and remote portable locations

QUICK PAY

- ci-80 accepts all major credits cards—Visa, Master Card, American Express.
- Fleet Server module accepts fleet/proprietary cards
- Businesses can offer and accept loyalty cards

FLEXIBLE

- Multiple ci-80 terminals can be operated through a single site computer
- System can utilize single or multiple Kraus 500 registers
- ci-80 works with Gilbarco, Wayne PC5, Tolkheim or Gasboy type pumps/dispensers
- Custom messages can be programmed to print on receipt tickets

RUGGED AND SECURE

- All credit card transactions are protected with SSL encryption—no customer or data or credit information is stored within the system
- Robustly engineered, CSA inspected, weatherproof enclosures are suitable for harsh environments, and is capable of operating in extreme conditions
- Bright, large VFD display operates in the most rugged conditions, from high heat to bitter cold.
- Both the ci-80 and receipt printer housings include individual thermostatically controlled heaters to regulate optimal internal climatic conditions.
- Multi-language display guides users through fuelling process safely and

- securely. Customized messages can be programmed to suit your needs.
- Display can run a safety quiz in compliance with unattended fuelling regulations of local authorities.

FUEL COMMANDER SOFTWARE

- Powerful and secure remote management program is capable of operating locally or remotely via telephone or over the Internet. Self diagnostic module can report most problems via pager or email
- System is designed to provide remote access allowing real-time adjustment of fuel prices and all promotional pricing, inventory tracking, account management, and tank level monitoring
- Fleet Commander program included for fleet card management and billing of house accounts
- Diagnostic capability will inform operators of pump issues, paper outages, bank line problems etc.
- Support for English or French languages

INCLUDED COMPONENTS

- ci-80 terminal includes card reader, 16 button stainless steel keypad, programmable VFD display, and thermal printer.
- PC with mirrored drive, UPS, communications box, plus modem(s) specific to the client's site.
