## Cardlock Management System For Windows

COMPUTROL's innovative **ProFuel** Cardlock Management System is the answer to complete automation of cardlock sites. This powerful package captures fueling transactions from the pumps, prices the transactions and updates customer and vehicle databases. In addition, detailed reports of fueling transactions by vehicle and by driver can be printed at any time showing odometer readings with miles per gallon calculations.

### ProFuel features:

- Sales and inventory activity monitored at multiple cardlock sites
- Automatically priced transactions by date and by customer
- Prints easy to read mileage, usage and inventory reports. Custom reports are available upon request.
- Maintains detailed customer vehicle and driver records
- On-Screen display shows up-to-the-minute inventory level and customer account balances.
- Allows global price change for quick and easy price updates of all cardlock accounts.
- Price changes may be made by product grade or by product type.
- Report data may be exported in many popular formats including: Excel, Lotus, RTF etc.

### AUTOPOLL

**ProFuel** features an easy to use interface to allow you to poll each or every cardlock station on an hourly, daily or custom schedule >

### COMMUNICATIONS

**ProFuel** connects directly to local Pump Control Units or communicates over telephone lines to remote sites. These connections provide functional control of each cardlock unit, regardless where they are located.

### CREDIT CONTROL

When you need better control over credit, **ProFuel's** options will let you update the pump controller to lock or unlock cards. ProFuel monitors and automatically determines who is over their preset credit limit.

**ProFuel** is one of the most innovative fuel management systems available today. It is cost-effective, convenient and simple to use. Regardless of your fleet size or vehicle types, **ProFuel** will help you control fuel costs.

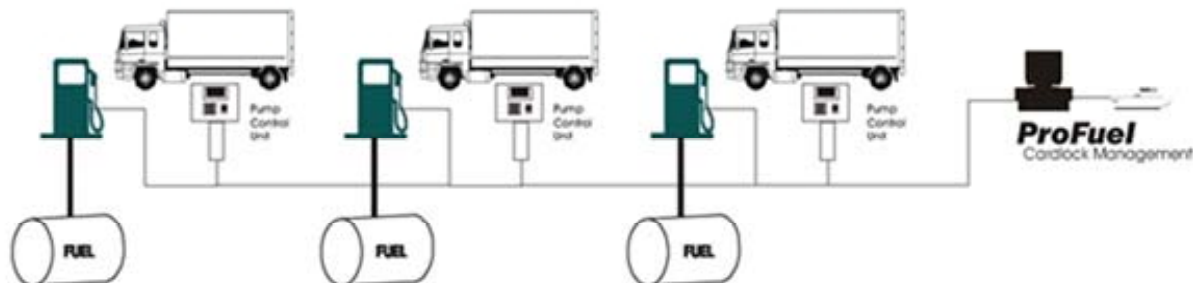

### FUEL CONTROL

**ProFuel** allow you to easily determine what products are to be sold to specific drivers or vehicles regardless of pump location. All products and pricing at all locations are easily entered into the system.

### REPORTS

Using the most sophisticated report manager available, **ProFuel** features reports that are easy to read and can be exported in many formats. Standard reports include, vehicle performance, user and vehicle activity, account and system summaries and upon request, custom reports are available.
